Commitment to Continuing Education

Paladin Medical is committed to continuing education, both as a presenter and as a participant. Participation at seminars and courses assures that our clients receive the latest technical and regulatory information. Presentations extend the services Paladin Medical offers to the medical device community, thus clients benefit directly from our continuing commitment to education. Recertification as a Regulatory Professional (RAC) also depends upon continuing education. For brevity, only recent selected examples are provided here. To request additional information and training before 1997, visit our website at www.paladinmedical.com.
